Category Breakdown

Headers	45/100
Transport	80/100
Cookies	55/100
Exposure	40/100

Findings (3 issues, 2 passed, 6 in your plan)

Content-Security-Policy Missing

CRITICAL

No CSP header was found, leaving the site exposed to cross-site scripting (XSS) injection.

REMEDIATION

Add a Content-Security-Policy header restricting script, style and frame sources to trusted origins.

HTTPS Enforced

PASSED

Site is served over HTTPS with valid certificate and automatic HTTP redirect.

Session Cookie Missing Secure Flag

HIGH

The session cookie is not marked Secure, allowing it to be sent over unencrypted connections.

REMEDIATION

Set the Secure and HttpOnly flags on all session cookies.

Server Version Disclosed

MEDIUM

Response headers reveal the exact web server and framework version.

REMEDIATION

Suppress the X-Powered-By and Server headers in production.

X-Frame-Options Present

Clickjacking protection header is correctly configured.

PASSED
